Subject: Monthly Report - April 1961

Reference: (RD) SG 1323 Task Order No. 15

Dear Sir:

The final report for Project 64.15 is being completed. The portion remaining is measured data and circuit description for the 500 to 1000 mc amplifier. The amplifier has proven very feasible in the breadboard stages. Some difficulty is being encountered in getting good performance with a small package. We are attempting to package the unit in a 3/4" x 3/4" x 2-1/2" chassis. The gain for this unit is about 13 db. An effort is being made to increase the gain without appreciably increasing the package size.

Very truly yours,

Project Director

LFR:gsj
